

MultiSlider plugin

Manual

The MultiSlider plugin allow you to place multiple sliders in any standard or custom widget zone on your website with an option to have a video background (YouTube, Vimeo or video file). Easily edit the style of the sliders with our Style editor.

Link your sliders to products on your site to promote sales.

The MultiSlider plugin is fully responsive, when using a video as a background you have the option to choose and background image for mobile devices, if no image is chosen the video background will scale with the device that is being used.

Installation

Extract the plugin folder from the zip file locally.

1. Upload the plugin to the /plugins folder in your NopCommerce directory.
2. Navigate to 'Configuration' > 'Plugins' in the admin of your website.
3. Click 'Reload list of plugins' button or restart the application.
4. Scroll down through the list of plugins until you find the newly installed plugin 'MultiSlider'.
5. Click on the 'Install' button to install the plugin. (if the plugin does not show in the list after clicking the Reload list of plugins button, 'Restart application' and the plugin should be displayed again).
6. After the installation, select your plugin again from the list and click on "Edit" button and check the 'Is enabled' checkbox.
7. Navigate to: 'Content Management' > 'MultiSlider' or click on the 'Configure' button for using the plugin / configuration.

Installation done!

Registering the Plugin

Registering the MultiSlider plugin is easy, installed the plugin, as instructed above, and once you have bought a License key navigate to 'Content management' > 'MultiSlider'.

At the top of the configuration screen you will see 4 tabs, 'Sliders', 'Configuration', 'Styling' and 'License', click the 'License' tab. Copy and paste the license key that was sent to you in the 'License key' input field, then click the save button. If all goes well, you should see text that says:

"Your MultiSlider plugin is registered for the domain name noptest41. To change the license key, please click here"

If you haven't purchased a license there is a link in the text where you can click which will take you to our site to purchase a license. In the text there is the url which you

should register your domain name. Once purchased follow the above instructions and the plugin should be registered and licensed ready to use.

Configuring your MultiSlider Plugin

On the main screen in the configuration, click the 'Configuration' tab. You will now see what you can configure. The first step is to choose a widget zone to display your MultiSlider, usually this will be the 'Home page top' widget zone.

The screenshot displays the configuration interface for the MultiSlider plugin, organized into several sections:

- Widget zone:** Includes a dropdown menu for 'Widget zone' (set to 'Home page top') and a text input field for 'Custom widget zone'.
- Video background:** Features a 'Use video background' checkbox, a 'Video type' dropdown (set to 'Url source'), and a 'Video source id/url' text input.
- Mobile video:** Includes a 'Use image for mobile' checkbox, an 'Image for mobile' text input, and an 'Upload a file' button.
- Slider options:** Contains several checkboxes: 'Auto play slides' (checked), 'Auto play delay' (set to 8000), 'Loop through slides' (checked), 'Use lazy loading' (checked), 'Disable on interaction' (checked), and 'Is a vertical slider' (unchecked).
- Navigation/pagination:** Includes checkboxes for 'Show navigation' (checked), 'Show pagination' (checked), 'Show progress bar pagination' (unchecked), 'Show fraction pagination' (unchecked), and 'Show scrollbar' (unchecked).
- Slider effects:** Features an 'Effect type' dropdown menu (set to 'No effect').

Widget zone

There are 2 options here, to choose a standard widget zone or a custom widget zone. If you have created a custom topics page with a custom widget zone, enter the name of the custom widget zone into the 'Custom widget zone' textbox, if not choose a standard widget zone from the dropdown.

The custom widget zone textbox will also take priority so if you are not using a custom widget zone, make sure that the textbox is empty.

Video background

The MultiSlider plugin gives you the option of having a video background for your sliders. If you wish to use this option:

1. click the 'Use video background' checkbox
2. choose the source of the of the video (Url source (file based), YouTube or Vimeo).

3. If you have chosen YouTube or Vimeo, copy the Video Id of the video you would like to use and paste it into the 'Video source/url'. If you have chosen for the 'Url source' copy the full url and paste it into the 'Video source/url'

NOTE: if you want to have a video background there is no need for any images on the sliders, use the textboxes to overlay the video background.

OPTIONAL: To cater for mobile users there is an option to replace the video with an image to stop use of high bandwidth on mobiles. To use this option click the 'Use image for mobile' checkbox and choose an image to use when the viewer is viewing on a mobile device.

Slider options

For the sliders there are various options that you can set:

- **Auto play slides:** this option, when checked will automatically start the slider when it is displayed.
- **Auto play delay:** This is the time delay between slides.
- **Loop through slider:** loops continuously through the slides
- **Use Lazy loading:** Use lazy loading for the slide images
- **Disable on interaction:** This will stop the slider if, for example, the mouse is placed over the slider.
- **Is a vertical slider:** by default, the sliders slides from left to right, this option allows you to slide the sliders from top to bottom.

Navigation/pagination

These are the settings for the slider.

- **Show navigation:** This turns the navigation of the slider (the left and right arrow on the slider) on or off.
- **Show pagination:** This turns the pagination (the dots at the bottom of the slider) on or off.
- **Show progress bar pagination:** This will turn the progress pagination (a progress bar at the top of the slider) on or off.
- **Show fraction pagination:** This will turn the fraction pagination (display a fraction number at the bottom of the slider) on or off.
- **Show scrollbar:** This will show a scrollbar at the bottom of the slider no or off.

Slider effects

This will set various slider effects to the sliders.

Creating slides

Click the 'Sliders' tab. To start to add slides to your slider click the 'Add new slide' button. This will open a popup.

Add new Save

Slider image 

Slider header

Slider sub header

Slider description

Slider link text

Slider link

Slider order

Is active

1. Choose your image for the slide.
2. Enter a header for the slide.
3. (optional) enter a sub header for the slide.
4. (optional) enter a description for the slide.
5. (Optional) enter a link text for the link button.
